Mercer Wall

Design by: David Abad

Inspired by the namesake street in New York City, David Abad's Mercer Wall light is designed around a rectangular block of gleaming granite. Marbled markings on the surface of the stone further evoke Soho's iconic cobblestone road. This elongated sconce maintains a minimalist profile while projecting a gentle illumination skyward. Amplify its visual footprint by selecting a contrasting metallic crossbar to intersect the stone/wood slab, or opt for a more muted impact with a monochrome pairing like black marble and black brass.
