

Pholc

Spinn Pendant

Sabina Grubbesson's Spinn Pendant, designed for the Swedish brand Pholc, has a textural shade made of waxed paper cord that reads like thread. The design was inspired by the craftsmanship and the wrapping of the seat of Hans Wegner's Wishbone Chair, an iconic creation born of the creativity that has made Scandinavian design so popular since it spread around the world like a wave during the 1950s. The pendant is available in dark blue and natural, the shades reflecting intricate patterns on surrounding surfaces in either color.
