

Hind Rabii

Belle D'I the Great Pendant

Design by: Hind Rabii

The Moroccan Beldi glass, used for teas and infusions, inspired the shape of the Belle D'I the Great pendant, which was designed by Hind Rabii. The shade made of mouth-blown glass holds clever perforated metal discs from which the two lights extend. The finishes available on the metal are a glossy gold and a glossy nickel. Just like a glass of hot water turns tea leaves into an aromatic drink, the Belle D'I the Great pendant turns light into a delicious glow. This is one of our offerings that is perfect for showcasing decorative Edison bulbs.
