Disca Large Pendant

Design by: Alberto Nason

Mimicking the shape of a far-off star, the Disca Large Pendant is a shining apparition that brings celestial beauty into a space. Designed by Alberto Nason, the Disca pendants are available with green, milky white or clear lava glass shades that hang from a perfectly fitted brushed gold metal piece matching the canopy. The quality of the glass is exceptional, the linear striations lending these fixtures added texture and personality, which is challenging to achieve with glass. We also offer the Disca in a table lamp.
