ICE 15 Pendant

The acronym ICE is Belgian for praline. Springing from the mind of Hind Rabii, the ICE 15 pendant is a paradoxical bonbon of a fixture given its contemporary lines achieved in metal in a variety of exterior and interior shade colors. The dynamic shell brims with excitement when its light bursts forth. The ICE 15 can be ordered with a black exterior with either a copper or carbon interior, with a white exterior with either a copper or carbon interior, with a mint exterior that has a copper interior, and with a bright blue exterior that has a carbon interior.
