

Jacco Maris

What? Wall Lamp

Design by: Jacco Maris

Handmade in Holland not only has a nice “ring” to it, it means Jacco Maris’ fixtures exhibit exemplary quality and jaw-dropping style only a lover of experimentation could achieve.

The electrical lightbulb was a marvel to those who had been accustomed to lighting their rooms with candles, the beginning of an entirely new era and what Jacco Maris used as his inspiration for his What? wall light. The fixture is constructed of exemplary materials reminiscent of that bygone time, though it is seriously cutting edge given its LED technology. The wall plate is made of cast bronze with a highly polished center, the most reflective sheen sitting directly behind the filament LED light bulb to ensure that an old-fashioned glow is spread brightly around the room.
