Don Gino 3G Table

Matteo Ugolini has been delving into the fashionable past with many of his latest designs, the Don Gino 3G table lamp, which can serve as a table or a floor lamp, a whimsical example of Victorian finery. But this curvy flashback to the ornamental candelabra can serve as a romantic perch for any number of kicky Edison bulbs to bring the past flickering into the future. Between the three versions of the Don Gino there is a variation in sizes, which makes them perfect for grouping.
