Mek Camshaft Pendant

If the Mek pendants, designed by Stefano Bizzarri and Claudio Cinti of Studio Bizzarri, have you shouting “Vroom, vroom,” it can’t come a surprise given these fixtures mimic the shapes of engine parts. Whether hung singularly or in grouped compositions, the Mek Clutch pendant, Mek Crankshaft pendant, and Mek Camshaft bring a touch of Steampunk to the spaces they illuminate. Each design is available in black ceramic, white and bronze ceramic, or white ceramic.
