City Globe Pendant - Gray Outer Acrylic Shade

Design by: Thomas Bernstrand

Designer Thomas Bernstrand took his lofty ambitions with the City pendant and lightened its profile by fitting it with an acrylic shade. That doesn't mean the City Globe pendant with a gray outer globe, has lost any of its industrial chic appeal, as the painted aluminum cog from which the shade dangles has a gear-like feel that heightens the light's handsomeness. Standard colors are white, black and blue, but the pendant can also be ordered in custom colors upon request. As for the inner glass, choose from an opal, cognac or gray glass.
