Mist Pendant

Design by: Front Design

The Mist series, by Front Design gleams its personality from hand-blown glass. With this series, the hues are pink, yellow and white—the top a keener shade of the color than the bottom. The double globes of the Mist pendant are illuminated by LED technology, the semi-transparency of the outer glass orb providing depth and creating the illusion that pastel light is glowing through a mellow steaminess. The fixture comes in small, medium and large sizes. Each Mist pendant light has its own unique expression, as the whiteness of the semi-transparent glass varies.
